

# Incident Response in The AI Era

**Best-of-breed responders strategically distributed across the globe, backed by a strong agentic platform**

## Agentic SecOps + Human Experts

It doesn't matter which technology you use for protection; **our infrastructure seamlessly integrates into your security pipeline** to handle potential threats.

## SECURITY JOES

### Our Story:

*The company was established as a service provider for incident response. During the years, we formed battle-tested automations and 24x7 team of elite experts. To scale, we developed the first Agentic SecOps platform to fully augment security.*

*(Ido Naor, founder & CEO)*

### Our Strategy:

- **Innovation and Automation:** Continuously innovate by integrating AI with our human experts to augment the entire Security Operations efforts.
- **Proactive Security:** Ensure that we are always there for our clients and be the first to respond, before an incident escalates.
- **Client-Centric Solutions:** Build strong relationships based on trust, tailored services, and transparent communication.
- **Scalability and Global Reach:** Make services scalable for both small and large enterprises and ensure we operate globally with regional expertise.
- **Community Engagement:** Evolve and donate to the cybersecurity community and stay connected with professionals to enhance thought leadership.

# What do we offer:

## Core SecOps Augmentation Platform & Services

**IntelliJOES Agentic SecOps Platform** together with human experts

### **24x7x365 Incident Response (IR) as a Service**

- The Incident Response package includes the involvement of at least 5 responders, a crisis manager and 72 hours allocated to the incident
- We provide rapid forensic analysis and root cause identification
- Seamless integration with security operations
- Our clients have real-time communication with our team

### **24x7x365 Managed Detection & Response (MDR) follow-the-sun**

- Our **MDR** team backs-up our proactive incident response team to provide real-time threat hunting, eradicate threats and contain the attack
- Proactive and **product agnostic** monitoring with **24/7 support**
- Attack remediation and continuous security posture improvement
- Recurring monthly vulnerability and asset management

### **Red Team as a Service**

Our seasoned **Red Team** researchers help you identify weaknesses in your systems before attackers do.

We provide:

- **Offensive security techniques** to assess your network, applications, and infrastructure, giving you actionable insights to reinforce your defense.
- **Penetration testing** and **vulnerability assessments**
- Full-scale attack simulations and **social engineering**
- Post-assessment debriefs and detailed reporting

### **Project-based Services**

All our packaged services can come also on a project-basis.

Contact our team and choose the service you need.

# Choose your package:

All of our packages include onboarding IntelliJOES, proactive incident response and one-time External Attack Surface & Compromise Assessment.

## Basic

Onboarding & IR Plan  
Incident Response  
bank hours  
24/7 support

## Core

Everything in **Basic**,  
plus **quarterly**:  
Incident Response  
Continuous  
Monitoring  
Threat Hunting  
Vulnerability &  
Asset Management  
**\*Ask us about Core+**

## Advance

Everything in  
**Core**, plus  
**monthly**:  
Threat Hunting  
Vulnerability &  
Asset Management  
Security Plan  
Threat Intelligence  
DevSecOps  
CISO consulting  
Red Team Activities

## Premium

Everything in  
**Advance**, plus:  
**Much more.**
