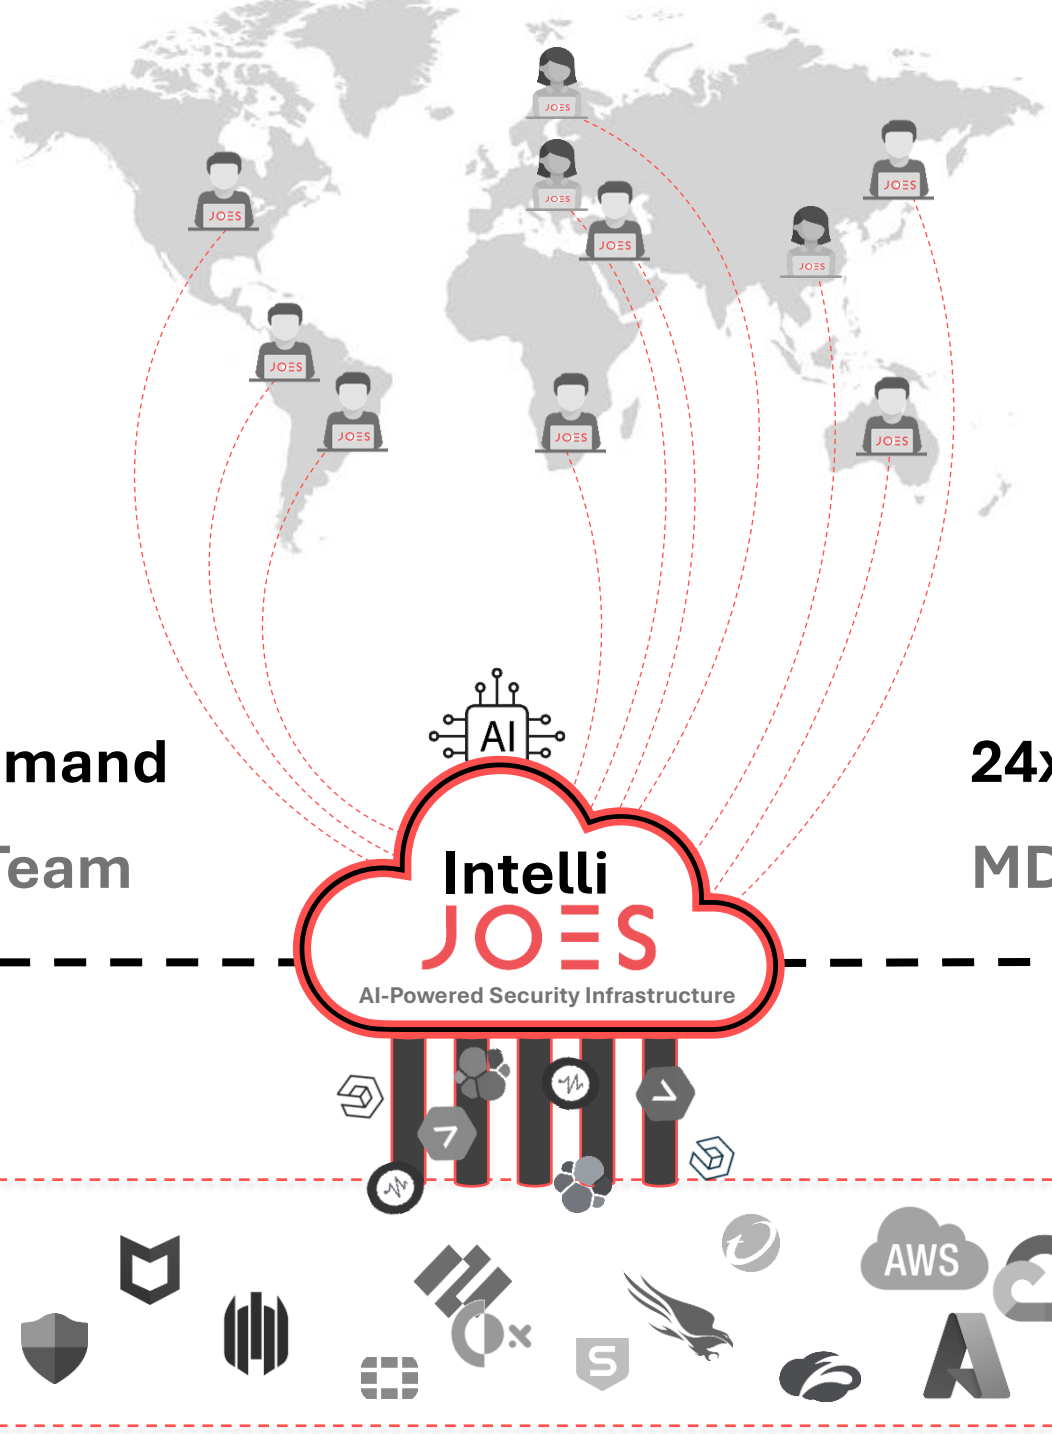
Incident Response

Best-of-breed responders strategically distributed across the globe

Follow-the-sun Model



On-Demand

Red Team

24x7x365

MDR & IR

It doesn't matter which technology you use for protection; our infrastructure seamlessly integrates into your security pipeline to handle potential threats.

SECURITY JOES

Our Vision:

To empower businesses with cutting-edge, proactive incident response solutions, building a resilient holistic posture through innovation, collaboration, and unparalleled expertise.

(Ido Naor, founder & CEO)

Our Strategy:

- **Innovation and Automation:** **Continuously innovate by integrating AI and automation to stay ahead in security.**
- **Proactive Security:** **Position Security Joes as a leader in proactive security services, with offerings like threat hunting and predictive analytics.**
- **Client-Centric Solutions:** **Build strong relationships based on trust, tailored services, and transparent communication.**
- **Scalability and Global Reach:** **Make your services scalable for both small and large enterprises and ensure you can operate globally with regional expertise.**
- **Community Engagement:** **Develop a cybersecurity community to stay connected with professionals and enhance thought leadership.**

What do we offer:

Core Services

24x7x365 Incident Response (IR) as a Service

- The Incident Response package includes the involvement of at least 5 responders, a crisis manager and 72 hours allocated to the incident
- We provide rapid forensic analysis and root cause identification
- Seamless integration with security operations
- Our clients have real-time communication with our team

24x7x365 Managed Detection & Response (MDR) follow-the-sun

- Our **MDR** team backs-up our proactive incident response team to provide real-time threat hunting, eradicate threats and contain the attack
- Proactive and **product agnostic** monitoring with **24/7 support**
- Attack remediation and continuous security posture improvement
- Recurring monthly vulnerability and asset management

Red Team as a Service

Our seasoned **Red Team** researchers help you identify weaknesses in your systems before attackers do.

We provide:

- **Offensive security techniques** to assess your network, applications, and infrastructure, giving you actionable insights to reinforce your defense.
- **Penetration testing** and **vulnerability assessments**
- Full-scale attack simulations and **social engineering**
- Post-assessment debriefs and detailed reporting

Project-based Services

All our packaged services can come also on a project-basis. Contact our team and choose the service you need.
